To whom it may concern,

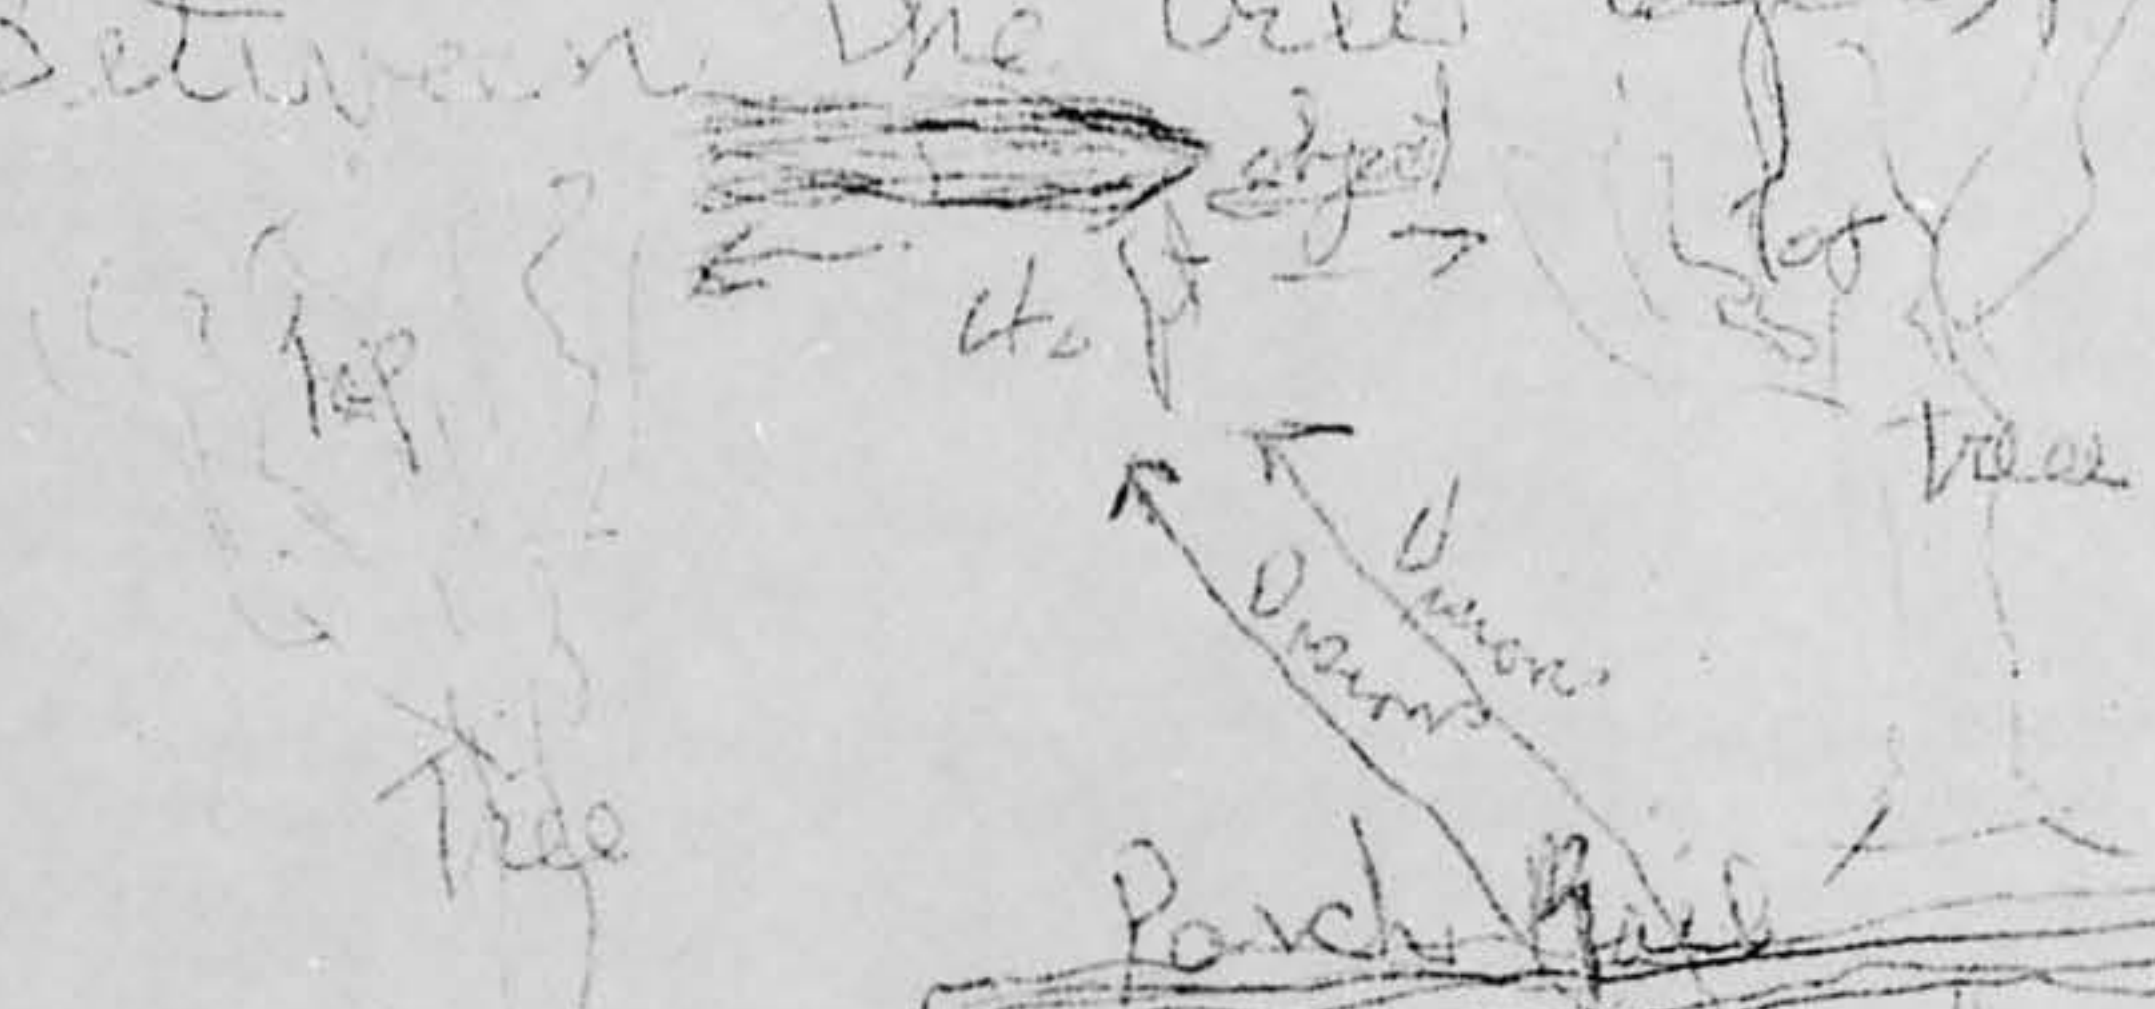

On July 64, while my wife and I were sitting on the front porch in the evening at 9:45 PM we saw a flying object, pass south of us going direct from East to West over street, (North West street) is on a direct line, north and south, this object was shaped like a .303 bullet, was too big to be the Hawk from a jet, single motor, was lit up so the whole object looked like burning magnesium, whitish light blue, and there was flames from front to rear and beyond the object which looked like it was maybe $1\frac{1}{2}$ feet in diameter, and over all about 4 feet or more long, moving very level, thru the sky, at about 4 thousand feet, maybe 2 thousand feet above what other Propeller type Planes fly, Passengers and jet Planes fly the course to the East of our house mostly.

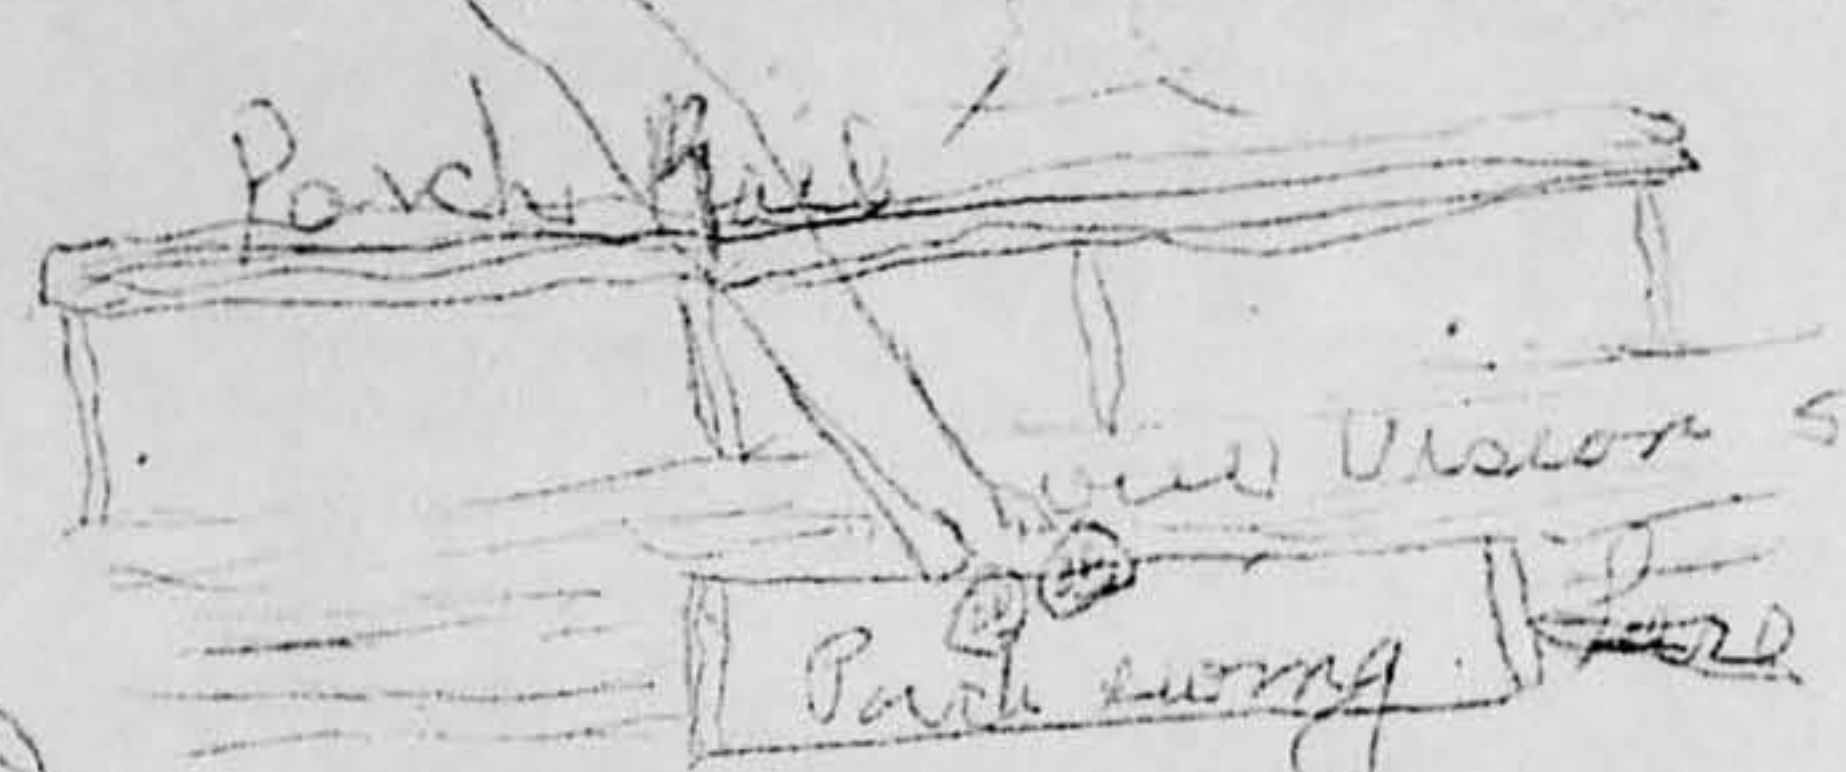

as the object

looked in the air, shape as near as I can describe, speed seemed about 3 times faster than the single ft. according to the time it was visible in about a 40 foot space between the tree tops,

as:

from porch swing view.

My wife and I saw this object at the same time.

This will do you and your observation. Costs any good there it will if you can understand this letter and sketch.

Yours truly

REPLY TO

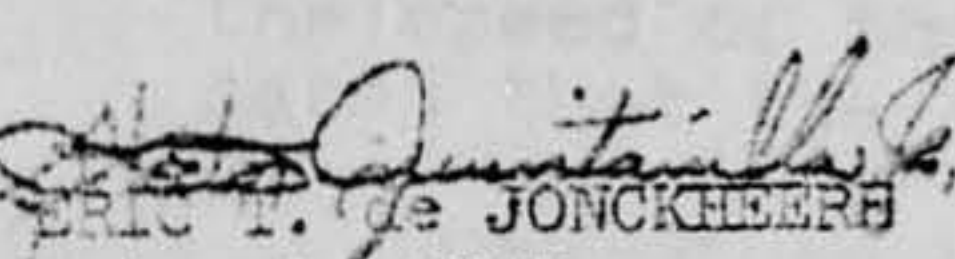

ATTN OF: TDEW

SUBJECT: Request for UFO Information (██████████)

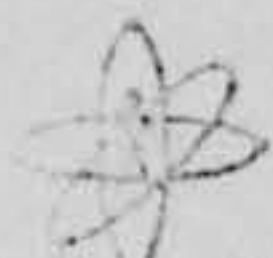

TO: Hq USAF SAFOT PB (Mrs. Gaiser)

Reference the attached letter from I ██████████, ██████████, Mason, Ohio. The object observed by Mr. ██████████ and his wife during July 1964, is characteristic of a meteor observation. The description is consistent with that of hundreds of similar reports of confirmed meteor sightings. While the duration was not reported, the speed of three times that of a jet aircraft indicates that the sighting was very brief. It is requested that Mr. ██████████ be informed of our evaluation.

YOU - THE NUCLEUS OF SECURITY!

File #4
MASON, OHIO

Mason

September 2, 1964

Dear Mr. [REDACTED]

Reference is made to a report of an unidentified flying object made by you and Mrs. [REDACTED]

The object you both observed is characteristic of a meteor observation. The description is consistent with that of hundreds of similar reports of confirmed meteor sightings. While the duration was not reported, the speed of three times that of a jet aircraft indicates that the sighting was very brief.

Thank you for reporting this observation to the Air Force.

Sincerely,

MASTON M. JACKS
Major, USAF
